

New FP120 is compact and easy to use, designed to handle the highest production volumes.

Unbeaten in terms of speed, precision, durability and quality. Depending on available space, or the space need behind the machine, the hydraulic and crimping unit can be separated or combined.

^{*} ACCORDING TO THE FITTING.

With standard dies. Crimping range can be increased with special dies.
Theoretical with 10 mm cycle.
Hydraulic hose / industrial hose

Maximum opening is the total die travel. Add this value to the minimum crimping diameter of the die set used. The result is the maximum opening of the machine with die set in place.
